

## Press Release

# Hanut 4U Entry server chassis launched

Jaipur (India), August 08, 2003: Hulasi Metals Pvt. Ltd. is pleased to announce the commercial launch of its Hanut 4U entry server chassis in India. Hanut entry server chassis is an ideal platform for building Intel Pentium 4 based servers and workstations.

The 4U rack optimized server case accepts standard and readily available server components like ATX motherboards, Intel Pentium 4 processors, IDE hard disk drives etc. allowing for flexibility, easy maintenance and up gradation.

Excellent ventilation and heat dissipation is ensured in the Hanut entry chassis through front to rear airflow design and 2 rear mounted 60mm ball bearing fans. Smart placement of the HDD cage minimizes chances of heat build up in the HDDs.

Hanut 4U entry server chassis is made from heavy-duty galvanized iron sheet and has extruded Aluminum profile supports along the sides. This rugged mechanical construction and use of imported anti vibration mountings in Hanut server case provide enhanced protection to installed server components and HDDs from shocks and vibrations.

Power supply plays an important role in determining overall server performance and up time. Among other server chassis accessories the company offers server grade EPS12V power supplies for use with the Hanut entry server chassis.

Hanut entry server case can be purchased online at web site: [www.hanut-india.com](http://www.hanut-india.com) and through upcoming nation wide sales partner network.

About the company

Hulasi Metals Pvt. Ltd. (an ISO 9002 certified company) is one of the largest manufacturers of CNC sheet metal cabinets, racks, sub-racks and related items for the Indian telecom and IT industries.
