

# Hanut India 4U Industrial PC Chassis

Right base for building high uptime & rugged computer systems

## Press Release

**April 2004: Hulasi Metals Pvt. Ltd., India is pleased to announce the launch of Hanut India 4U Industrial computer chassis.**

Hanut 4U industrial PC chassis are the right base for building high uptime and rugged computer systems for use in harsh industrial environment and mission critical applications.

For high ruggedness the chassis body is made from galvanized sheet steel and extruded Aluminum support profiles are attached on both sides of the chassis.

Installed computer components are protected from dust and heat buildup by industrial computer chassis's Advanced Forced Filtered Air Inflow System. The Chassis has a high efficiency, user replaceable filter at air inlet. A dual ball bearing fan throws the filtered air into the chassis creating an optimal front to rear airflow pattern inside the chassis.

The 4U industrial PC chassis is available in 14 slot passive back plane and ATX motherboard models.

The chassis will be manufactured in company's ISO 9001: 2000 certified facility in the Jaipur city.

Detailed information about the 4U industrial PC chassis is available on company's comprehensive IT products website: [www.hanut-india.com](http://www.hanut-india.com).

## About the company

Hulasi Metals Pvt. Ltd. (HMPL) is one of the largest manufacturers of CNC sheet metal cabinets, racks, card cages and related items for the Indian telecom and IT industries.
