

Press release: Hulasi launches NXT series of 19" server racks

May 29, 2005: Hulasi Metals Pvt. Ltd. (Hulasi) is pleased to announce the launch of NXT (next generation) series of 19" server racks. In addition to incorporating the field tested and popular features of STD (standard) series of server racks Hulasi's engineers have built in significant enhancements into this new series of server racks. Hence the series name - NXT (next generation). Major enhancements include unique 64% perforated Airmax doors with multi step profile, user removable doors for easier equipment installation, rack frame that has high rigidity and superior weight bearing capacity. In addition to these functional enhancements the NXT series of server racks have significantly superior aesthetics.

This series is targeted towards BPOs, data centers, software development centers, Indian and overseas corporate customers who require feature rich and premium quality server rack solutions. The NXT series of server racks will be marketed through company's existing nation wide reseller network.

Detailed information about the NXT series of server racks is available on company's comprehensive IT products website: www.hanut-india.com .
